Positive Architecture

a Pod Design Manifesto

Positive architecture, also known as architecture for well-being or architecture for positive impact, refers to the practice of designing buildings and spaces that enhance the physical, mental, and emotional well-being of individuals and communities. It goes beyond functional considerations and seeks to create environments that promote positive experiences, social interaction, and a sense of connection to nature.

1. Human-Centred Design: Positive architecture puts human needs, experiences, and well-being at the centre of the design process. It considers factors such as comfort, accessibility, safety, and user satisfaction to create spaces that enhance the quality of life.

2. Biophilic Design: Biophilic design incorporates elements of nature and natural materials into the built environment. It recognises the innate human connection with nature and seeks to integrate greenery, natural light, views of nature, and other natural elements to improve well-being and reduce stress.

3. Well-being and Health: Positive architecture promotes physical and mental health by incorporating features that support wellness. This includes considerations such as good air quality, natural lighting, access to nature, spaces for physical activity, and the integration of calming elements and colours.

Design Story

Engineered forms, crafted finishes

Eden reimagines the workspace as a sanctuary of comfort, productivity and well-being.

The genesis of our design approach lay in a desire to create a pod system distinctive for a high-quality aesthetic which could be refined by the specifier to meet the functional and aesthetic requirements of their interior scheme.

Eden's form begins from a minimalist standpoint, with clean lines, considered geometry and a precisely engineered structure. This leads to a light intervention within the space, seamlessly integrating the décor approach with the surrounding architecture.

With fabrics, upholstery, textures, colour, biophilic elements and more, the character of each Eden pod can be sculpted through a wide gamut of features and furnishings to define its role within the scheme. High quality materials and finishing at every touchpoint soften the space, elevate its level of comfort and create a sensory experience.

Eden consciously realises the potential of workplace pods to make a positive impact within a space – human-centric design that promotes well-being, respects privacy, creates a stress-free sensory experience and meets the needs of a diverse, modern workplace culture.

Eden

Flexible & Intuitive

Eden's specification journey begins with four modules ranging from a one-person focus pod to a six-person meeting space, which can be configured in clusters to meet multiple functional and working style requirements. Focus work, two- and four-person meets, individual and group videoconferencing, and six-person meets can all be accommodated.

However, Eden shifts the workplace paradigm completely with the option to specify each unit with lounge furnishings. Beau, Boss Design's generous, high-comfort modular lounge system brings another level of flexibility and comfort for appealing, informal spaces to meet, share ideas, communicate, make decisions or simply socialise.

EDEN ONE

EDEN TWO

EDEN THREE

EDEN FOUR

○ **EDEN TWO** Informal Interactions

Ideal for informal short interactions, where privacy is required. A comfortable and intimate space designed for seamless communication and collaboration.

○ **EDEN ONE** Focus Pod

A perfect private space for video calls and focused work. Designed to enhance productivity and well-being, this well proportioned pod offers a calm environment, optimised light and air levels, with customisable biophilic elements.

○ **EDEN THREE** Meeting

Proportioned for meetings and team working, this versatile pod provides a private, comfortable space designed to enhance collaboration and productivity. With its elegant design and customisable features, the ideal environment for focused teamwork and effective meetings.

EDEN FOUR Meeting & Lounge

PEden Four offers unparalleled versatility, seamlessly adapting to various needs within your workspace. It can serve as a dedicated meeting space, a private lounge for informal gatherings, or an efficient office space. Whether you're hosting team discussions,

relaxing in a comfortable setting, or focusing on individual tasks, Eden Four provides the perfect environment. Its adaptable design ensures that it meets the demands of any setting, offering flexibility and functionality without compromising on style or comfort.

○ **EDEN Privacy Slats**

The external privacy slats, in Oak, Walnut, and Stained Black Oak, provide partial privacy and diffuse light. Available in 950 panels for full or partial window coverage, they allow for a customisable level of seclusion while maintaining a connection with the surrounding environment.

○ **EDEN Planting**

The Eden faux planting brings the tranquility of nature indoors. Introducing natural forms and textures that reduce stress and promote well-being. Arrangements of dried organic plants and high-quality faux foliage offer a vibrant, low-maintenance solution. Available in a variety of styles and colours, seamlessly integrating with Eden to create a serene, nature-inspired atmosphere.

○ **EDEN Internal Curtains**

The internal curtains allows for a variable levels of privacy, with different colours, textures, opacities and acoustic values to completely tailor your space.

○ **EDEN THREE Video Suite**

The rotated internal structure provides screen seclusion for video conferencing, ensuring privacy and focus. This spaces privacy is further augmented by internal curtains, manifestation, and timber privacy slats.

○ **EDEN AV**

AV is included as standard: including X2 Power unit with USB A&C, Screen HDMI port, 1 x TV bracket

Connection with nature

Opportunities to utilise organic forms, materials and colours abound with Eden – elements from nature that put people at ease. However, Eden goes beyond other pod systems in its application of biophilic principles with the option to specify foliage arrangements, adding greenery and unique natural forms to the aesthetic. Not only do they enhance visual interest, but studies have shown that plants – both real and faux – reduce stress and stress-related conditions in the workplace.

A sensory experience

Eden is a pod system designed to appeal to the senses – human-centric design that begins with the high-quality visual, aural and tactile elements of the surroundings, and leads to an emotional connection with the space.

Nuanced lighting, simple geometry, colours, fabric and wood textures, biophilic features and the organic forms of the furniture – each contributes to an atmosphere that puts the user at ease. An airflow system and natural light, if used in the scheme, add to the sense of well-being Eden can evoke for a space that is comfortable both physically and psychologically.

A Light Touch

Eden's beautiful engineering is exemplified by its frameless, continuous glazing and elegant glass-to-glass corners. Ideal in spaces with an abundance of natural light, it allows this resource to flow through the setting to the benefit of its users.

A Sustainable Approach

In accordance with the Boss Design Sustainability Manifesto, environmental impact has been considered at every stage in Eden's design and manufacture. Its principal materials – glass and aluminium – are 100% recyclable. Hardwood panelling options are sourced from FSC-certified suppliers and are 100% recyclable. Each item of furniture is manufactured to the same high standard, with exceptional build quality leading to long-lasting products for a lower full-lifecycle carbon footprint.

The deployment of pods as an alternative to building alterations will significantly enhance the sustainability of a project. Not only is Eden more cost effective than hard construction it vastly reduces the carbon footprint of a refurbishment. The pods can be relocated, reconfigured and refitted to extend their serviceable life as requirements within a space evolve.

Eden

Focus & Video Conference

EDEN/1

Standard Features

Fenix desk
Power unit with USB A&C
Black powder coated frame
Pivot door with drop seal
1 x LED linear light
Airflow system
Motion sensor - PIR operated light / fan
Internal acoustic panels - Band 1
External acoustic panels - Band 1
VC Shelf - Fenix shelf with integral light

Optional Extras

Fenix external cladding (x4 panel)	
Oak external cladding (x4 panel)	
Oak window privacy panel	
Black oak window privacy panel	
Reeded privacy door manifestation	
Acoustic ceiling upgrade	
Roof Planting	
Internal acoustic panels - Band 2

Lighting

Hue Pendant Light

The Philips Hue White Ambiance Cher pendant light in black offers warm-to-cool white light to help you read, relax, concentrate and energise throughout your day. Control instantly with the included Hue dimmer switch or Bluetooth or add a Hue Bridge to unlock even more smart lighting features.

Ottavino Wall Light

Ottavino is a durable, IP44-rated wall light with a contemporary twist. The double-glass shade creates a comfortable, warm glow perfect for task lighting.

Venn Wall Light

With its sleek design evoking modernist architecture, Venn provides warm, inviting light to any contemporary guest room or other hospitality space. Its versatile wall-mounted design and durable, die-cast zinc base make Venn the ideal ambient lighting choice.

Zeppo Wall Light

Inspired by the elliptical shape of an historic airship, Zeppo is a flush-fitting bathroom wall light that casts a warm glow. Made from duplex glass for optimal diffusion, it's designed for use alongside mirrors and is now available with a contemporary matt black bracket.

Curtains

Visual and Acoustic privacy

Sway

SWAY is made using 100% inherent FR recycled polyester REPREVE® yarns. High-quality fibres are made from 100% recycled materials, including post-consumer plastic bottles and pre-consumer waste. Using recycled instead of virgin polyester produces fewer carbon emissions.

Link

LINK is made using inherent FR recycled polyester REPREVE® yarns – the world's leading brand of recycled performance fibre. REPREVE® high-quality fibres are made from 100% recycled materials, including post-consumer plastic bottles and pre-consumer waste. Using recycled instead of virgin polyester produces fewer carbon emissions...

Nuance

Nuance is a mixtures of yarns and fibres, in a sensitive weave constructions. With a refined two-tone character with one colour in the warp and another colour in the weft. This flame retardant sheer is available in 5 colours and woven at 300cm, making it perfect for beautifully tall windows wanting some privacy without blocking any light.
